Air pollution is one of the most pressing environmental challenges of our time. In Europe, it causes over **400.000** deaths every year because of health issues. From urban smog to invisible household pollutants, the air we breathe is under constant threat.

Our solution? **Nexair** – an advanced air purification system designed to combat air pollution at its source. Using a GeFM experimental technology which removes harmful particles providing clean, breathable air for a healthier life.

OUR POTENTIAL INVESTORS

European Funds

- LIFE Programme
- Horizon Europe

Italian National Recovery and Resilience Plan (PNRR)

- M2C4 – Protection of Territory and Water Resources
- M2C1 – Circular Economy and Waste
- M1C2 – Digitization and Innovation in Public Administration

TARGET MARKET
B2G

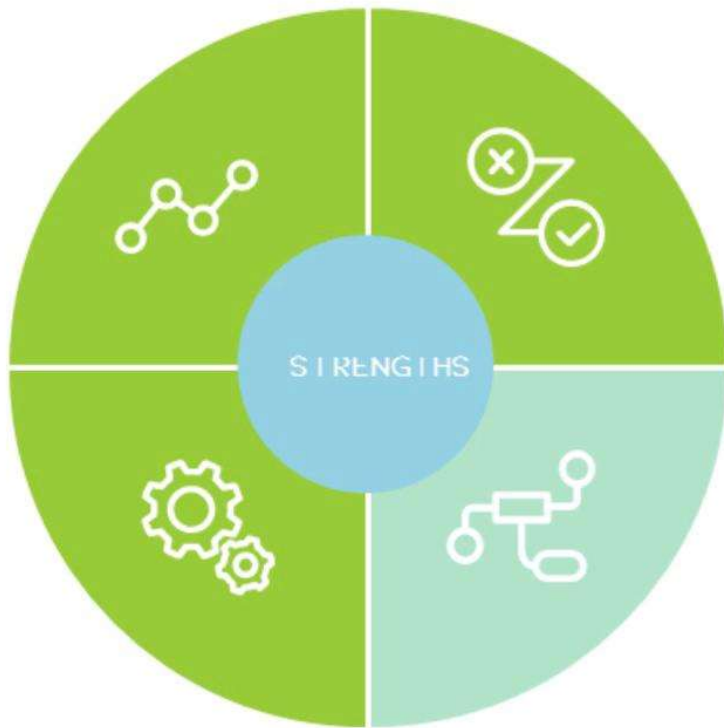

FROM THEORY TO PRACTICE

- Sandwich structure
- High pressure axial fan
- Wind break grilles
- GeFM technology

WHY US?

Main Edges:

- Low Maintenance
- Small Dimensions
- Decentralization
- Low energy consumption
